

2003 GM Door locks

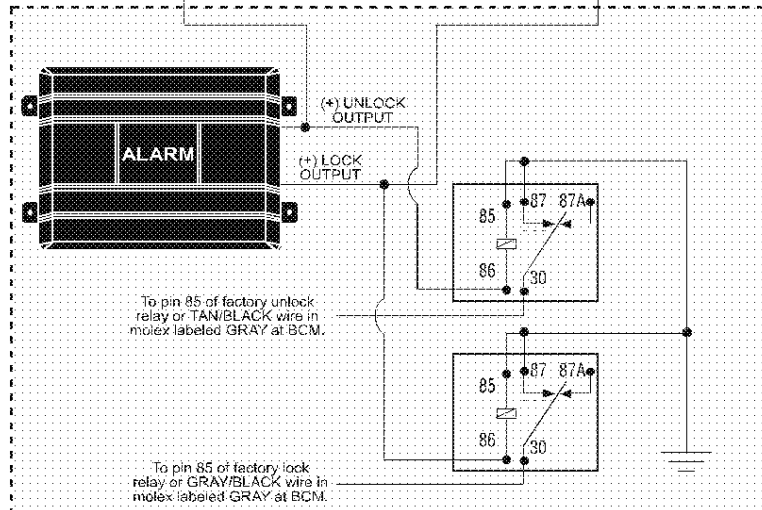

Full-Size Pickup/Tahoe/Suburban/Yukon/Escalade/H2

The 2003 full-size Pickup, Tahoe, Suburban, Yukon, Escalade, and H2 utilize both Type B and Type C door locks. The front doors are Type C but all the rear doors are Type B. Since the locks are controlled by the GM Data Bus System there is no central location to control the locks using standard methods. This illustration is broken into two sections. The top section shows what is required to integrate with the Type C locks used in the front doors. The bottom section shows what is required to integrate with the Type B locks used to control all the rear doors.

This portion must be completed in both front doors.

This portion controls all rear doors (it is not necessary on the two-door pickup).
