Additional Wiring Notes

Item	Note
Headlight	The light switch removes by pulling the knob straight off (dont break the little bulb inside) and unscrewing the big nut. Under the rubber boot on the back of the switch are screw terminal connections. ALso find gray/red and gray black wires at the fuse box.
	The light switch removes by pulling the knob straight off (dont break the little bulb inside) and unscrewing the big nut. Under the rubber boot on the back of the switch are screw terminal connections. ALso find gray/red and gray black wires at the fuse box.
	Starter wire goes to a relay locted just above the fuse panel. Also locate at a terminal strip on the passenger side inner fender.
Trunk/Hatch Pin	Solder wire directly to switch contact at light/switch fixture.
