Additional Wiring Notes

Item	Note
Parking Lights (+)	The factory alarm may trigger when using the aftermarket system because there is a sensing circuit on the parking lights. In these cases use the turn signals for flashing light. Use all four and use 6 amp diodes to isolate each.
Key Sense	The BCM is in the passenger side footwell, under the carpet.
Parking Lights (-)	The BCM is in the passenger side footwell, under the carpet.
Reverse Light	The BCM is in the passenger side footwell, under the carpet.
Left Front Door Trigger	Use both wires and diode isolate each. The BCM is in the passenger side footwell, under the carpet.
Dome Supervision	The BCM is in the passenger side footwell, under the carpet.
Trunk/Hatch Pin	The BCM is in the passenger side footwell, under the carpet.
Hood Pin	The BCM is in the passenger side footwell, under the carpet.
Trunk Hatch/Release	The BCM is in the passenger side footwell, under the carpet. The fuel door release is pink (+) at the switch in the center console.
Horn Trigger	The BCM is in the passenger side footwell, under the carpet.
Tachometer	The PCM is located on the passenger side of the engine compartment. Remove the right front tire and remove the access panel in the inner fender to access the PCM.
Speed Sense	The PCM is located on the passenger side of the engine compartment. Remove the right front tire and remove the access panel in the inner fender to access the PCM.
